

## 1ST PLACE GREEN CAR CHALLENGE

Still running on adrenaline from a third-place finish at the The Tire Rack One Lap of America, Kevin Boulton and M. Harmony were forced to overcome more than a couple hurdles on their way to their UTCC trophy, including a broken suspension mounting tab on Saturday and a cracked oil pan early Sunday. Their supercharged Honda S2000-powered Ultralite runs on E85, which made their car the most powerful and lightweight of all those eligible for the Green Car category.

### OVERALL FINISH: 12th
